ROYAL POOL

EVERY 4TH POSITION FROM EACH SLOT AFTER THE FIRST CYCLE GOES TO THE ROYAL POOL.

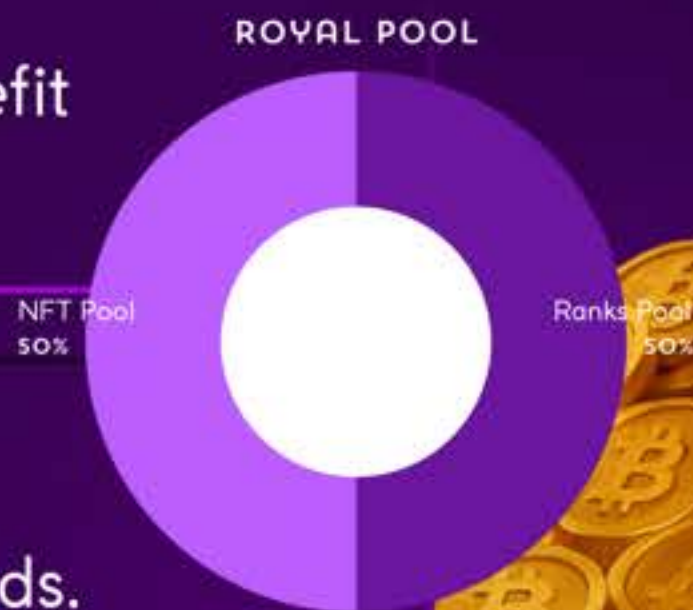

The Royal Pool Fund consists of two key components:

NFT Liquidity:

This setup enables the community to benefit from the appreciation in NFT prices.

Ranks & Rewards:

Additionally, members can earn passive income through monthly ranks and rewards.

WELCOME PASS (NFT)

Whenever a member joins, they receive a unique NFT that serves as their Entry Pass. A new NFT is minted at the time of joining, and once the member exits or sells their position, that NFT is automatically burned. An added advantage is that with just 0.0001 BTC, you not only unlock a business model capable of earning up to 61 BTC, but you also receive this NFT for free. By holding it, you have the opportunity to sell it later at a higher market price, giving you an additional profit on top of your main earnings.

Starting Price: 0.0001 BTC

Target Price: 1 BTC

Locking Period: 100 days

NFT LIQUIDITY POOL

Every 4th position from each slot, after completing the first cycle, goes into the Royal Pool. From this pool, 50% of the funds are added to the NFT Liquidity Pool, which continuously increases liquidity and raises the price of the Welcome Pass NFT. You can sell your NFT anytime at the live market rate.

Funds for the Liquidity Pool will come from the three clubs listed below:
